SKILLS

- Programming Languages:
 - Java
 - Javascript
 - Python
- Web Development Frameworks:
 - React.js
 - Next.js
 - Node.js
 - Express.js
 - FastAPI
- Database Management:
 - SQL (Postgre, MySQL)
 - NoSQL (MongoDB)
- QA Tools
 - Playwright
 - Postman
 - k6
- Technical Support & IT Skills
- AI Tools
 - OpenClaw
 - Hugging Face Models

QUALITIES

- Self-motivated and Adaptable
- Problem solving skills
- Fast learner

CERTIFICATES

Wadhani: Employability Skills
Dean's List (SY 2022 - 2025)
TESDA CSS NCII (2022)

EXPERIENCE

AI - Prompt Engineer 2025
Research & Development Intern Project

Openclaw Project Management Automation – AI Lark bot that automates meeting documentation: receives a Lark meeting link, extracts transcript via lark-cli, generates AI summaries and action items using OpenAI GPT, and creates a formatted Lark document with a one-click button. Built with OpenClaw skills, Python, and the Lark API.

Full - Stack Developer 2025
Undergraduate Research

AI-Powered Academic Forum – A full-stack web application built with React.js and Tailwind CSS, featuring a real-time backend using Express.js and Socket.IO. Uses PostgreSQL for authentication, database management, and media storage, including Google OAuth. Integrates AI services for content validation, summarization, comment verification, and vote validation.

Full - Stack Developer 2025
Freelance Project

Barangay Management System – A full-stack web application developed with React.js and Tailwind CSS for managing resident registration, certificate requests, and complaint reporting. Built with an Express.js backend and MongoDB for data management, featuring an admin panel for approvals and records. Includes downloadable certificate PDFs and SMS notifications via ClickSend for announcements and updates.

System Designer 2024
Academic Project - Web Design

SkidDept – A Figma-designed bike application concept that allows users to purchase items from verified stores and post content to a community feed. Focused on clear user flows, intuitive navigation, and a clean, user-centered interface.

Full - Stack Developer 2024
Academic Project - Advance Database

Cycle Co. (Bike Rental Management System) – A Java-based desktop application built with Swing for the user interface and SQL for database management. Designed for a bike rental shop, the system records customer identification prior to renting, tracks rental duration, calculates rental fees based on hours, and helps manage bike availability and rental flow.

EDUCATION

Bachelor of Science in Computer Science CLASS OF 2022 - 2025
Centro Escolar University - Makati

Science, Technology, Engineering and Mathematics (Senior High School) CLASS OF 2020
Crecencia Drusila Lopez Senior High School
